Ms. Tayar has warned that Forex business requires patience and applied knowledge over the long term, and for those who are willing to enter these markets ; should not surrender to invest large sums of money in a single operation, it is clear that it may be very tempting, especially if the investor believes that he has the right information to take risks, but the market direction could change at any moment, so better to go step by step, and open demo accounts to obtain sufficient expertise and experience in the application of strategies before risking real money. The majority of online Forex companies offer demo accounts. One of the most important trading conditions for the investor is to avoid risking more than 2% of the capital in a single operation since rush is very bad advice in this business.

" One of the most important characteristics of successful trading, is to acquire market knowledge, discipline, transactions control, trading pursuant to a strategy, decision-making not to be set on a random manner, using low financial leverage. She invited all interested to participate in the activities of the Conference and to visit the exhibition and benefit from the explanations and services indicating that participation in Forex 2012 events and visit the exhibition; shall be free of charge" added Katia Tayar, Founder & President of Arabcom group the Organiser
